INVESTMENT OBJECTIVE & STRATEGY

The Fund's investment objective is long-term capital appreciation. The Fund invests mainly in stocks of U.S. companies, emphasizing those companies with prospects for rapid earnings growth. These stocks typically provide little current income. The Fund's portfolio consists predominantly of U.S. small- and mid-cap securities and may include securities of foreign companies. Through its research and evaluation of the relationship between growth prospects and valuation, the advisor identifies stocks that it believes over a three-to five-year time frame will outperform the S&P's 500® Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies.

GROWTH OF \$10,000 INVESTMENT

This chart illustrates the performance of a hypothetical \$10,000 investment in the Fund since its inception on November 1, 2004. Assumes investment of dividends and capital gains, but does not reflect the effect of any applicable sales charges or redemption fees. This chart does not imply any future performance.
