### INVESTMENT OBJECTIVE & STRATEGY

The Fund's investment objective is long-term capital appreciation. The Fund invests mainly in stocks of U.S. companies, emphasizing those companies with financial results which PRIMECAP Management Company believes will evolve materially better than consensus expectations. Through its research, the advisor identifies stocks that it believes over a three- to five-year time frame will outperform the S&P 500® Index. The advisor looks for companies that in its judgment will grow faster and/or will be more profitable than their current market valuations suggest, and for companies with asset values that are not adequately reflected in their stock prices.

### GROWTH OF \$10,000 INVESTMENT

This chart illustrates the performance of a hypothetical \$10,000 investment in the Fund since its inception on November 1, 2004. Assumes investment of dividends and capital gains, but does not reflect the effect of any applicable sales charges or redemption fees. This chart does not imply any future performance.

### IMPORTANT DISCLOSURES

**The S&P 500® Index** is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. You can not invest directly in an index. **Market cap** is the market price of an entire company, calculated by multiplying the number of shares outstanding by the per share price.

**The price-to-earnings ratio** ("P/E Ratio") is a valuation ratio measuring a company's current share price divided by its annual earnings per share.

**The 3-5 year earnings-per-share growth rate** ("3-5 Year EPS Growth") is an estimate of an individual company's annual earnings growth rate over the next 3-5 years.

**Active Share** is a measure of the percentage of stock holdings in a fund's portfolio that differ from the benchmark index.

**Earnings growth is not a measure of the Fund's future performance.** Fund holdings and sector allocations are subject to change and are not recommendations to buy or sell any security.
